TECHNICAL RIDER

Light

We will bring two backdrops (1 m / 3,28 ft width x 3 m / 9,84 ft height) for the left and right side of stage. We need mounting possibilities and two floorspots to illuminate the banner and a third one behind the drumset.

We prefer blue and green over warm red and yellow. If available, laser, scanner and moving heads would be much appreciated!

Also fog is required. A lot of fog. We also have our own fog machine, just to be sure, but an appropriate machine at the venue would be better. Please tell us if fog can't be provided because of fire detectors.
